November 5, 2021

Dear Valued Customer,

Due to the change in market conditions and the global business climate, Rathbone Precision Metals is announcing a price increase effective with all orders shipped after January 1, 2022. Prices will be increased 8 to 10% on average.

The increase is necessary given our increased costs and inflationary pressures that we face. As you are aware, cost pressures are not limited to just raw materials but also include labor, utilities, supplies, packaging, and freight.

Capacities and overall mill constraints continue to push lead-times out and we strongly encourage our customers to review their requirements and place orders sooner rather than later.

Rathbone is committed to meeting your current and future requirements. We will continue to monitor the market and deliver the best value for your organization.

As always, the Rathbone team appreciates your business and looks forward to being your valued supplier.

If you should have any questions or concerns, please do not hesitate to contact your sales representative.

Best Regards,

Kathryn Orszulak
President

Scott Chisholm
